

# Python iterables

## python

- <https://kinsta.com/es/blog/iterables-de-python/>
- <https://ellibrodepython.com/iterator-python>

## diccionario

```
diccionario = {10:'diez', 20:'veinte', 30:'treinta'}

for clave in diccionario.keys():
    print(clave) # 10,20,30

for valor in diccionario.values():
    print(valor) # diez,veinte,treinta

for item in diccionario.items():
    print(item[0], '->', item[1]) # 10 -> diez, 10 -> diez, 20 -> veinte, 30 ->
treinta

for clave, valor in diccionario.items():
    print(clave, '->', valor) # 10 -> diez, 10 -> diez, 20 -> veinte, 30 -> treinta
```

## lista

- Enumerate():

```
fruits_list = ["Apple", "Mango", "Peach", "Orange", "Banana"]

for index, fruit in enumerate(fruits_list):
    print(fruit, index)

for index, fruit in enumerate(fruits_list, start = 2):
    print(fruit, index) # index empieza en 2
```

- ```
for elemento in lista
    print(elemento)

# recorrer por índices
for x in range(0, len(lista)):
    print (lista[x])
```
