

# Ejercicio: modificar hardware MV

```
Vagrant.configure(2) do |config|
  config.vm.box = "debian/jessie64"
  config.vm.hostname = "prueba1"
  config.vm.provider "virtualbox" do |vb|
    vb.name = "prueba1-vm"
    vb.memory = "512"
    vb.cpus = 2
  end
end
```
