2.Python - Working with Sheet

```python
import openpyxl
import os

os.getcwd()
os.chdir(path)

wb=openpyxl.load_workbook('...xlsx')
type(wb)
wb.get_sheet_names()
```

```python
sheet=wb.get_sheet_by_name('pestanya')
type(sheet)
sheet.title
sheet.max_row
sheet.max_column
sheet.title='nou nom'
sheet.save('file.xlsx')
```

```python
for i in range(1,sheet.max_column+1):
  e=sheet.cell(row=1,column=i)
  print(e.value,end=' ')

lista = []
for i in range(1,5):
  e=sheet.cell(row=5,column=i)
  lista.append(e.value)
```

</code>

3.Reading and Writing Rows in Excel
