

rsyslogd

<https://aelog.org/use-the-raspberry-pi-as-a-syslog-server-using-rsyslog/>

/etc/rsyslogd

para permitir conexiones remotas a nuestro sistema de log, descomentar:

```
# provides UDP syslog reception
$ModLoad imudp
$UDPServerRun 514

# provides TCP syslog reception
$ModLoad imtcp
$InputTCPServerRun 514
```
