generar

- <http://www.htaccesstools.com/htpasswd-generator/>
- \$ `htpasswd <opciones> <user>`
 - opciones:
 - `-c <fichero>`
 - `-m` Force MD5 encryption of the password (default).
 - `-d` Force CRYPT encryption of the password.
 - `-p` Do not encrypt the password (plaintext).
 - `-s` Force SHA encryption of the password.
- en PHP:

```
<?php
// Password to be encrypted for a .htpasswd file
$clearTextPassword = 'some password';

// Encrypt password
$password = crypt($clearTextPassword, base64_encode($clearTextPassword));

// Print encrypted password
echo $password;
?>
```
